FLAMES OF WAR

THE WORLD WAR II MINIATURES GAME

FLAMES OF WAR

Collecting a *Flames Of War* army may seem daunting before you begin, but you will quickly discover how much fun it is. In fact, many find that they cannot stop at just one army or force, and usually end up with two, three or more forces at various stages of completion. Some people require patience and motivation to see an army through to the end. And many painters find themselves easily distracted by new miniatures for completely different forces all the time. But that is half the fun!

Flames Of War miniatures are 15mm, or 1:100 scale unless otherwise noted.

PLATOONS

In *Flames Of War*, the basic unit is a platoon. Each platoon diagram indicates the required teams you must have to make that unit.

Each platoon entry in a *Flames Of War* book reflects the historical make-up of the platoon, and tells you how to base the blister or box set that represents that particular unit.

Flames Of War box sets are designed around unit entries in *Flames Of War* books, and come with all the options needed to make a platoon.

Shown here is an example of a US Armored Rifle Platoon unit card and how it looks in miniature form when made from the corresponding box, UBX75.

DIRECT ONLY & LIMITED AVAILABILITY PRODUCTS

While we would like to provide every product as a general release, sometimes it isn't practical to do so.

To satisfy gamers that do want to model everything, including the initial Normandy beach landings, for example, we have made these models available as a Direct Only range available to order from our website:

www.FlamesOfWar.com

The *Flames Of War* range is constantly evolving. Some products get updated and replaced, while others are limited to a single production run.

Limited availability products will only be available while stocks last, so make sure you get yours while stock is available.

THE CLASH OF STEEL RANGE

Late-War: Leviathans offers you the opportunity to play games of *Flames Of War* with some of the armoured vehicles that were in development at the end of World War II.

These Leviathans can be found as part of the *Gale Force Nine: Clash of Steel* miniatures range.

The *Clash of Steel* range of plastic miniatures has been designed by the same team at Battlefront that has already created hundreds of kits for the *Flames Of War* and *World War III: Team Yankee* ranges, using the latest digital technology to create highly detailed robust models that stand up to the rigours of gaming.

Clash of Steel is a brand-new game from the design team at GF9 and Battlefront. It features Dynamic Mission Based Game Play to ensure that every battle is unique and cinematic. It is based on an Alternative History where the war in Europe finishes in 1944 with the surrender of Germany, but restarts just four years later in the face of Soviet aggression.

Players take to the tabletop with one of four initial forces (German, British, American or Soviet) in Epic Tank-On-Tank Combat using Highly Detailed Multi-Part Plastic Miniatures, battling over objectives in an attempt to control the battlefield and defeat their enemies.

LEVIATHANS STIR

It emerged out of the gloom, its creaking and clunking preceding it. Sergey's eyes widened as the massive sand-colour beast crested the bridge, barely squeezing between its iron girders. The bridge visibly shook with its weight as the tank rumbled toward his gun's position.

"Fire," the battery commander yelled and Sergey pulled the lanyard on his 100mm anti-tank gun. A cloud of dust and smoke enveloped the gun and momentarily obscured the view ahead.

"Nu vot," Sergey expressed his surprise as the dust cleared and a massive German heavy tank loomed over him, completely unharmed.

During the course of World War II all the major powers were working on new and radical designs of weapons and equipment, the most famous among them being the German *Wunderwaffen*, Wonder-Weapons, like the Maus super-heavy tank. The Allies were also busy developing the new designs incorporating lessons learned from the fighting as well as newly developed technology such as the American T-28 assault tank, the British Centurion universal tank, and the mighty Soviet IS-7 heavy breakthrough tank.

Inside *Leviathans* you will find many of these weird and wonderful tanks, and other weapons that just missed World War II. However, we offer you four possible scenarios outlining events that may have seen World War II continue beyond its historical end, from turning to fighting the expansion of communism, through to a new war against a resurgent Germany.

Fight *Flames Of War* battles with these Leviathans with their heavy armour and massive guns, either by adding them to your standard games, or using the new Leviathans games rules to fight with forces of these brutal brutes.

INSIDE YOU WILL FIND:

- Alternative Background for the War continuing beyond May 1945 in Europe.
- How to play Big Games with Leviathan tanks.
- Instructions on how to build: US Formations fielding T28 and M26 Pershing assault tanks, T29, T30, and T34 heavy tanks, M26 Pershing and M4 Easy Eight medium tanks, and armoured rifles.
- British Formations fielding Tortoise and Churchill assault tanks, Centurion and Charioteer tanks, and Saracen mounted motor infantry.
- German Formations fielding Maus and E-100 super heavy tanks, Tiger II and Tiger I heavy tanks, Panther (8.8cm) and Panther (7.5cm) tanks, E-100 and Skorpion tank-hunters, and Panzersturm infantry.
- Soviet Formations fielding IS-3, IS-7, T-10 heavy tanks, T-44 and T-54-1 medium tanks, ISU-130 assault guns, and BTR-152 mounted motor rifle infantry.
- Painting and Basing guides.
